

The **DRACO**®

The DRACO® luminaire has combined performance and efficiency. The four piece integrated extruded aluminum ballast housing is designed for suspension cable or rigid pendant mounting.

12" or 16" refractors are used. Refractors are available in acrylic translucent prismatic design available in clear, red, blue, green, and amber. Spun aluminum reflectors are also available.

The DRACO® is available in several design styles, the BS710, BS720 and BS730. It also comes in LED, compact fluorescent (lamps).

The DRACO® bottom is available in etched glass, spun aluminum or open design. These options provide increased diffusion or maximum light output to assist in luminous performance.

Integrated emergency backup is available.

The LED design provides a 100,000 hour lamp life @L₇₀ reducing maintenance and energy costs. The DRACO® offers up to 16 million colours including white light.

DRACO® is ideal for retail environments, open ceiling areas, loft style offices and cafes.
